Zápy

Zápy Industrial Zone
12.2 ha, connected to the industrial zone in Brandýs nad Labem
Za družstvem Industrial Zone
9.4 ha adjacent to an exit for the R10 expressway
Former premises of PREFA company
13.7 ha for industrial production and storage and for environmentally-friendly production and commerce

The small town of Zápy, with a population of 6,000, is located near the E65 (R10) expressway Prague–Mladá Boleslav–Turnov. Its easy access is an important incentive for the development of new activities in the municipality. The various development sites near the municipality offer many types of investment opportunities (from “green fields” to developed areas). The easily accessible land has already attracted certain companies (Mercedes-Benz, Lidl).

Principal data
Area: 12.2 ha Zápy industrial zone (Site A), 9.4 ha Za družstvem industrial zone (Site B), 13.7 ha Prefa (Site C)
Anticipated use: industrial production and storage; additional development areas intended for environmentally-friendly production and commerce are adjacent to the zones
Zone location: • Site A 1 km northwest of the developed area of the municipality on the opposite side of Road R10 (development zone connected from the south with the Brandýs nad Labem developed area) • Site B is connected in the south with the municipality’s developed area • Site C 1.5 km northeast of the municipality beyond the railway line on the left bank of the Elbe
Current use and land ownership: • Site A is available land, is next to Lidl’s storage complex, and is owned by a private individual • Site B is available land – agricultural land owned by private individuals, connected to facilities with unused buildings of an agricultural cooperative (several owners, including the government and the municipality) • Site C is a complex previously used by Prefa (construction), currently used as storage space for other entities.

Municipal plan – regulations, restrictions
Zones use complies with the valid municipal plan. Site B, immediately next to the municipality’s developed area, is being changed from industrial production and storage to environmentally-friendly production and commerce. The regulations restrict the maximum development density to 40% and require a minimum of 30% green areas. The maximum height of structures in Site A is 15.5 metres and 12 m for the other areas. Use is restricted by the protective zones of the utilities infrastructure.

Transportation
Roads: the R10 expressway Prague–Mladá Boleslav–Turnov
Railways: the nearest railway stations are Lázně Toušeň (2 km), Brandýs n. L. (2.5 km) on line no. 074 Čelákovice–Brandýs n. L.; the sidetrack leading to Site C will be disconnected

Infrastructure
Water: all zones may be connected
Sewer system: all zones may be connected to the sewer system; the rainwater drainage for Site A is not resolved
Electricity: a 22 kV power line accessible in all zones
Natural gas: all zones may be connected
Industrial waste: Benátky nad Jizerou, an incinerator in Lysá nad Labem
